By Ethnicity	77
By Gender	78

Introduction

This report contains the retention and graduation patterns of full-time undergraduate students entering Maryland's public four-year colleges and universities from 1986 to 2006. Specifically, it looks at the number and percentage of students who were retained at their original public four-year campus and those who graduated from any senior public college or university in the State.¹ Utilizing this approach, a student who matriculated at one of the thirteen Maryland public four-year institutions but transferred to, and subsequently graduated from, a different Maryland institution (public or independent) would still count toward the graduation rate of the originating institution, regardless of the amount of time spent at either institution.

Figures for the entering class of 1996 and beyond include the following changes which resulted from the development of the Federal Graduation Rate Survey (GRS):

- Retention rates of all first-time undergraduates and not just first-time freshmen are included. This allows for the inclusion of students who are first time college students but, through advanced placement or other early credit-granting means, have accumulated enough college credits to enter above freshman standing.
- Students who are enrolled at multiple institutions are included more than once in the cohort. Prior to the 1996 cohort, these cross-enrolled students were reported at only one campus on a randomly selected basis.
- If an institution reports a new social security number for a student, the student is tracked on the basis of the new number. In earlier cohorts, these students were treated as having dropped from the institution. The impact of this change is greatest at institutions with a large number of foreign students, who are often assigned "dummy" social security numbers when they initially enroll.
- The method used to match student enrollment and degree attainment is based on the federal GRS procedures and on the recommendations of an intersegmental workgroup.

Information on cohorts from previous years remains unchanged. There are no significant policy changes in Maryland's data resulting from GRS.

This report also includes Maryland residents who enrolled at a public institution between 1998 and 2006 and who subsequently transferred to a Maryland state-aided independent

¹ While included in the aggregate statewide tables, individual institution data for the University of Baltimore, the University of Maryland, Baltimore and the University of Maryland University College have been excluded. The University of Baltimore is excluded because it currently enrolls very few first-time students. The University of Maryland, Baltimore is excluded because it does not enroll first-time students. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

college or university. Nearly all of these institutions began providing the Commission with unit record information about the enrollment and degree achievement of new full-time students who are Maryland residents beginning in fall 2004. Maryland residents who enrolled at a Maryland state-aided independent institution in 2006 have been tracked into their second year, those who enrolled in 2005 have been tracked into their third year, and those who enrolled in 2004 have been tracked into their fourth year. Statistics for the public institutions include all first time, full time students, regardless of residency.

Six-Year Graduation Rates: Maryland Public Institutions

- The six-year graduation rate for the most recent cohort of all new full-time students is at an **all time high** of 64.2 percent. The six-year rates have risen for eight consecutive cohorts (starting from 55.4 percent in 1993). The public institutions with the highest six-year graduation rates for the entering class of 2001 were St. Mary’s (85.5 percent), UMCP (79.8 percent), and Salisbury (74.5 percent). St. Mary’s, UMCP, UMBC and Towson University all experienced historic highs in their six-year graduation rates.

- The 2001 entering cohort of Asian (75.8 percent), Hispanic (67.0 percent) and white (74.7 percent) students set **all time highs** in six-year graduation rates. African-Americans fell for a second straight year, to 44.7 percent.

Trends in Six-Year Graduation Rates at MD Public 4yr Institutions by Ethnic Group				
	1986	1991	1996	2001
All Students	55.8%	55.1%	59.3%	64.2%
African-Americans	34.5%	40.0%	45.1%	44.7%
Asians	62.1%	61.0%	70.4%	75.8%
Hispanics	57.8%	51.9%	56.5%	67.0%
Whites	62.4%	64.0%	66.6%	74.7%

Source: MHEC Enrollment and Degree Information Systems

- Once again, Asian students had the highest six-year graduation rate of any racial/ethnic group.
- For the second year in a row, and just the fourth time in the past sixteen years, the Hispanic six-year graduation rate exceeded the overall graduation rate.
- The four-year public institutions that had the greatest six-year graduation rates among African-Americans in the 2001 cohort were St. Mary's (75.8 percent), UMCP (67.9 percent), UMBC (64.4 percent) and Towson (62.5 percent). Towson and UMCP achieved historic highs in the six-year graduation rates of African-Americans at their institutions for the second straight year.
- In many cases, even institutions with notable graduation rates for their African American students experienced considerable gaps between their overall rate and their African American rate. The difference between the overall and African American six-year graduation rates was largest at Salisbury (16.4 percentage points) and UMCP (11.9 percentage points). UMBC was the traditionally white institution with the smallest six-year graduation rate gap between all students and African-Americans (0.6 percentage points).
- The 2001 cohort of male students set another all-time high with a six-year graduation rates of 60.8 percent, while the rate for women decreased slightly to 67.0 percent (down from 67.7 percent last year). Since the Commission began collecting these statistics, the graduation rates for women have been higher than those for men. However, over the last nine years, the gap between men and women has been reduced by half; from 12.4 percentage points in the 1992 cohort to 6.2 percentage points in the 2001 cohort.
- The six-year graduation rate for African-American men dropped to 37.5 percent (a decrease of 1.2 percentage points), while the rate for African-American women remained virtually the same at 49.1 percent (down just 0.1 percentage points from last year).
- The six-year graduation rate for African-American women has consistently exceeded the rate for African-American men, but for the first time in four years, the gender gap between African-American men and women grew, increasing to 11.6 percentage points for the 2001 cohort up from 10.5 percentage points for the 2000 entry cohort.

Second Year Retention Rates: Maryland Public Institutions

- The second-year retention rate of all full-time, first-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 78.5 percent for the 2006 cohort.

- Declining for the third consecutive year, this is the lowest second-year retention rate in 15 years.

- Four of the public 4-year institutions improved their second-year retention rate for the 2006 cohort (UMCP - 92.4 percent, St. Mary's - 90.9 percent, UMBC - 84.4 percent, Towson University - 80.9 percent). These four institutions are also the same four schools that achieved record highs in their six-year graduation rates.
- Asian students had the highest second-year retention rate (87.3 percent) of all racial/ethnic groups.
- The second-year retention rate for African-American students declined for the third straight year to 69.7 percent. This is a nineteen year low and marks the first time since the 1987 cohort that this group's retention rate has dipped below 70 percent.
- The second year retention rates of African-American students in the 2006 cohort were the highest at UMCP (90.8 percent), UMBC (90.4 percent), Salisbury (85.6 percent), and Towson (84.9 percent). The second year rates of African-American students at Frostburg, Salisbury, Towson, UMBC and UMES exceeded those of whites.
- After two years of declining retention rates, Hispanic students in the latest cohort had a higher second-year retention rate than the previous year's cohort (from 78.9 for the 2005 entry cohort to 80.8 for 2006).
- In the overall population, female students have always exceeded their male counterparts in second year retention since the Commission began collecting this data. While both groups declined this year, the men in the 2006 cohort have closed the retention rate gap to just two-tenths of a percentage point. The second-year retention rate for women was 78.6 percent while the rate for men was 78.4 percent.

- African-American females have achieved higher second year retention rates than African-American male students in all but one cohort (1988). As a result of decreases in both groups' retention rates, the retention rate gap between African American males and females is currently 0.8 percentage points. The second-year retention rate for African-American women fell 3.5 percentage points to 70.0 percent while the rate for men declined slightly to 69.2 percent (down from 69.9 for the 2005 cohort).

Second-Year Retention Rates: Maryland Residents at Maryland State-Aided Independent Institutions

- At Maryland's independent institutions the second-year retention rate of all full-time, first-time undergraduate Maryland residents returning to their original campus after one year, increased for the second straight year to 79.7 percent for the 2006 cohort. Second year retention rates of Maryland residents at Johns Hopkins University (93.1 percent), Loyola College (89.4 percent) and Maryland Institute College of Art (89.4 percent) exceeded those at all other State-aided independent institutions in Maryland.
- The second-year retention rate for African-American Maryland resident undergraduates increased by almost 7 percentage points over the 2005 cohort to 71.4 percent. The second year retention rates of African American Maryland residents at Johns Hopkins University (92.6 percent), Loyola (87.5 percent) and Villa Julie College (86.4 percent) exceeded those for African American Maryland residents at all other State-aided independent institutions in Maryland.
- For the first year since data became available, the second-year retention rate for women (80.1 percent) exceeded that for men (79.1 percent) among Maryland residents at state-aided independent institutions.
