#### **INTRODUCTION**

This report presents data on the retention and graduation rates of first-time, full-time undergraduate students who initially enroll at public four-year colleges and universities in the state of Maryland. The graduation trends in this report include undergraduate students who persisted at and graduated from the campus at which they initially enrolled, as well as those who transferred to and then graduated from any of the four-year colleges or universities, including independent institutions, in Maryland. This analysis features six-year graduation rates, or the percentage of students who receive a bachelor's degree within six years of initial enrollment. The four- and five-year graduation rates are included in the tables beginning on page 12. The retention rates in this report include the percentage of first-time, full-time students who remained enrolled at the same institution in subsequent fall semesters. This analysis also includes second-year retention rates, or those students who enroll for a second consecutive fall semester.

The new data presented in this report are for the 2007 through 2012 entering cohorts of undergraduate students enrolled in Maryland's public four-year institutions. These data are disaggregated by gender, racial/ethnic group, and institution. Cohorts are defined by year of entry (first-time enrollment). The six-year graduation rate for the 2007 cohort measures the number of students who entered Maryland higher education in fall 2007 and graduated before fall 2013. The second-year retention rate of the 2012 cohort measures the number of Maryland students who enrolled in higher education for the first time in fall 2012 and were still enrolled in fall 2013.

The first section of this report presents data on undergraduate students who entered Maryland's public four-year colleges and universities<sup>1</sup> from 1987 to 2012. For the first time, this report includes six-year graduation rate data for the University of Baltimore (UB). Before 2007, UB did not enroll first-time undergraduate students. The second section of this report presents the 2012 cohort retention rates and 2007 cohort graduation rates for Maryland residents who entered one of the state's independent postsecondary institutions. All data in this report comes from MHEC Enrollment and Degree Information Systems, unless otherwise noted.

Figures for the entering class of 1996 and beyond include changes resulting from the development of the IPEDS Federal Graduation Rate Survey (GRS)<sup>2</sup>. The data collection and reporting requirements in this analysis are the following:

• The method used to match student enrollment and degree attainment is based on the federal GRS procedures and on the recommendations of an inter-segmental workgroup.

<sup>&</sup>lt;sup>1</sup> Data for the University of Maryland, Baltimore and the University of Maryland University College have been excluded. The University of Maryland, Baltimore is excluded because it does not enroll first-time students. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

<sup>&</sup>lt;sup>2</sup> In 1990, Congress enacted the Student Right-to-Know Act (SRTK) which requires colleges and universities to disclose the rate at which students complete academic programs at postsecondary education institutions. The GRS is the federal data collection instrument for four-year postsecondary institutions.

- Prior to the 1996 cohort, students who enrolled simultaneously at multiple institutions were reported at only one campus on a randomly selected basis. Currently, a cross-enrolled student is included at every institution at which they are enrolled, provided their total course load is equivalent to full-time status.
- When institutions report a new identification number for a student, the student is tracked on the basis of the *new* number. In earlier cohorts, students with new identification numbers were treated as no longer enrolled or dropped from an institution. This process mostly affects institutions enrolling a large number of international students, who often are assigned "dummy" identification numbers upon initial enrollment.
- Information on cohorts from years prior to 1996 remains unchanged.

#### ANALYSIS AND DISCUSSION

#### **Maryland Four-Year Public Institutions**

#### Six-Year Graduation Rates for All Students

- The six-year graduation rate for first-time, full-time students rose from 61.6% for the 2006 cohort to 63.8% for the 2007 cohort (see Figure 1). This is the first increase after three consecutive years of decreases although this rate is still below the 2003 peak rate of 64.7%.
- Six-year graduation rates increased at seven out of eleven four-year public institutions in Maryland including: Bowie State University, Frostburg State University, the University of Maryland Baltimore County, the University of Maryland College Park, the University of Maryland Eastern Shore, Morgan State University, and St. Mary's College of Maryland. The rate for Salisbury University remained constant. The University of Maryland University College and the University of Maryland Baltimore were excluded from this analysis.
- Several institutions saw notable increases in the six-year graduation rates of their students. The University of Maryland College Park and the University of Maryland Baltimore County had their highest six-year graduation rates in 20 years at 84.4% and 68.8% respectively. Additionally, the 2007 cohort at Morgan State University had the highest graduation rate in more than five years with a rate of 34.9%.

#### Graduation Rates by Race and Ethnicity

- The six-year graduation rate for African American students increased to 43.8% for the 2007 cohort from 41.5% for the prior cohort (see Figure 2 on the next page).
- Graduation rates for students at the University of Maryland College Park (77.7%) and the University of Maryland Baltimore County (67.5%) were the highest they have been in 15 years.
- St. Mary's College of Maryland (76.7%), Towson University (62.1%), and Salisbury University (62.0%) had the highest six-year graduation rates among African American students in Maryland for the 2007 cohort.
- The graduation rates for African Americans attending Maryland's historically black institutions (HBIs) are as follows: 37.7% at the University of Maryland Eastern Shore, 37.7% at Bowie State University, 33.5% at Morgan State University, and 14.8% at Coppin State University.
- Among all races and ethnicities, the six-year graduation rate increased the most for Hispanic students. The rate increased by 4.3 percentage points to 68.3% for the 2007 cohort, up from 64.0% in the 2006 cohort.
- Graduation rates for every race and ethnicity are higher than they were 20 years ago, despite recent decreases in the last five years. Hispanic students have achieved the largest increase in graduation rates over the past 20 years (15.8 percentage points).
- Across all racial and ethnic groups, statewide graduation rates were highest for Asian (76.0%) and white (75.4%) students. The rates for both populations increased from last year, as the rate for Asian students grew from 74.5%, and the rate for white students rose from 73.8%.

#### Graduation Rates by Gender

- Consistent with the national trend, male graduation rates trail those of their female peers. Nationally, the six-year graduation rate for male students at public institutions is five points behind that for women. In Maryland the graduation rate for female undergraduates attending public four-year universities in Maryland was 66.1% and exceeded the 61.1% graduation rate of their male peers by five percentage points (see Figure 3). However, the Maryland rate has steadily dropped over ten years from a 10.7 percentage point difference in 1997.
- Although there is a gap between male and female graduation rates, they are growing at similar rates. For both men and women, the rates for the 2007 cohort were approximately two percentage points higher than those for the previous cohort and are the highest they have been in three years.
- The graduation rate for female students rose 2.4 percentage points from last year's rate of 63.7%, and is only 1.6 percentage points away from the highest female retention rate for Maryland (67.7%). Similarly, the graduation rate for male students increased by 2.0 percentage points from last year (59.1%) and is less than the one percentage than the highest male retention rate (61.6%).

- The gap between male and female students in Maryland has gradually narrowed since the 1990s. Over the past ten years, the gender disparity has fallen from 10.7 percentage points to 5.0 percentage points. While the six-year graduation rate for males has improved over the last ten years (from 55.4%), this growth has begun to taper off in the last five years. In contrast, the graduation rates for female students remained stable and mirror those of 1997 at 66.1%.
- The gender gap is largest for African American and Hispanic students. The six-year graduation rate for African American male students remained relatively constant at 36.5% compared to last year's rate of 36.6%. By contrast, the 2007 graduation rate for African American female students grew to 48.8% from 44.5%, the highest rate in five years. The six-year graduation rate for Hispanic females rose to 73.7% from 68.5% for the 2006 cohort. The rate for Hispanic males also increased, to 62.2% from 57.9%. Large fluctuations in this rate may be due to a relatively small student population. The 2007 cohort included 269 Hispanic females and 241 Hispanic males, compared to 2,501 African American females and 1,597 African American males.

#### Second-Year Retention Rates for All Students

• The second-year retention rate for first-time, full-time undergraduates at public institutions in Maryland was 82.8% for the 2012 cohort, which was a slight increase from 82.5% for the previous cohort. This is the highest rate in the last 20 years (see Figure 4).

- Six of the eleven four-year public institutions saw increases in the second-year retention rates of their students. The University of Maryland College Park had the highest retention rate for the 2012 cohort at 94.4% (up from 93.7% in 2011). This is on par with their performance in 2009 with a retention rate of 94.8%, their highest on record. In addition to UMCP, the following public four-year institutions experienced gains in their second-year retention rates: Frostburg State University, Towson University, University of Maryland Baltimore County, Morgan State University, and St. Mary's College of Maryland.
- Several institutions have made considerable strides in their second-year retention rates. For instance, Frostburg State University had the highest retention rate for their institution in 20 years at 76.8%. The 2012 cohort at Towson University also saw considerable growth in its retention rate at 86.0% (the highest rate in over ten years). Furthermore, rates at both the University of Maryland Baltimore County and St. Mary's College of Maryland were the highest rates for their institutions in four years (at 85.3% and 90.0%).

#### Second-Year Retention Rates by Race and Ethnicity

- For the 2012 cohort, Asian students achieved the highest second-year retention rate (91.0%) among all racial and ethnic groups (see Figure 5). For the second consecutive year, Asian students achieved the highest retention rate on record for any racial or ethnic group dating back to 1978.
- The retention rate for White students increased to 86.4% from 85.6% and that of Asian students increased to 91.0% from 90.7%.

- The second-year retention rate for African American students in the 2012 cohort did not change from the previous cohort (75.4%). This retention rate is the highest in over ten years for African American students.
- The highest retention rates for African American students were at the University of Maryland College Park (93.0%), the University of Maryland Baltimore County (91.8%), Towson University (91.1%), Salisbury University (84.2%) and Frostburg State University (79.8%). Of particular note, the 2012 African American student cohort at Frostburg State University had its highest second-year retention rate on record, and the University of Maryland Baltimore County saw its highest rate for African American students in over ten years.
- The 2012 retention rates for African Americans attending Maryland's HBIs are as follows: 72.1% at Morgan State University, 70.0% at Bowie State University, 68.0% at the University of Maryland Eastern Shore, and 59.1% at Coppin State University.

#### Second-Year Retention Rates by Gender

• With few exceptions, female students have consistently attained higher second-year retention rates than their male peers. However, for the 2012 cohort, this gap was minuscule as the female retention rate went from 83.8% in 2011 to 82.8% in 2012 and male retention rate went from 81.6% in 2011 to 82.7% in 2012 (see Figure 6).

 African American females continued to achieve a higher second-year retention rate than African American males. The retention rate for African American female students in the 2012 cohort was 76.4%, compared to 73.7% for male students. This 2.7 percentage point gap is a decrease from the previous year's gap of 4.3 percentage points.

#### **Maryland State-Aided Independent Institutions**

The final section of this report examines the most current six-year graduation rate and secondyear retention rate data for Maryland residents who began their academic careers at one of the state's independent institutions. Most of these institutions began providing MHEC with studentlevel information about the enrollment and degree completion patterns of Maryland residents in the fall of 2004. The overall graduation and retention rates at the independent institutions do not permit direct comparisons between these two institutional types because they measure different groups. While the rates for public institutions include all first-time, full-time undergraduate students, the rates for independent institutions include only students who are Maryland residents. Moreover, students who enroll initially at independent institutions cannot be followed from one institution to another.

#### Six-Year Graduation Rates

- The six-year graduation rate for the 2007 cohort of first-time, full-time Maryland residents at State-aided independent institutions was 65.4%, which is a decrease from 69.0% for the 2006 cohort.
- The independent campuses with the highest six-year graduation rates for Maryland residents were Loyola University Maryland (83.8%), McDaniel College (82.7%), Mount

St. Mary's University (78.8%), Johns Hopkins University (77.0%), Washington College (76.9%), Hood College (74.9%), and the Maryland Institute College of Art (72.4%).

- The six-year graduation rate for African American students in the 2007 cohort decreased from 44.1% to 41.0%. The six-year graduation rate also decreased for White students in the 2007 cohort from 75.1% to 74.4%.
- Consistent with the statewide trend at public institutions, female students at independent institutions had a higher six-year graduation rate than their male peers (68.6% compared to 59.5%).

#### Second-Year Retention Rates

- The 2012 second-year retention rate for Maryland residents attending Maryland independent institutions increased by 5.6 percentage points, to 78.8% from 73.2% in 2011.
- The second-year retention rate for both African American and White students increased for the 2012 cohort. The rate for African American students saw considerable growth from 61.3% to 71.3%, whereas the rate for white students saw a smaller rise from 79.4% to 82.5%.
- Similar to the statewide trends at public institutions, the second year retention rate at independent State-aided institutions showed only a slight gap between male and female students for 2012. For this cohort, female students had a retention rate of 79.0% compared to their male peers who had a retention rate of 78.5%.

#### CONCLUSION

The six-year graduation rates for Maryland public institutions have significantly improved over the last three years. The rate for the 2007 entering cohort of students reached a three year high of 63.8%. However, this graduation rate has still not reached the all-time high of 64.7% in 2003.

Statewide, the six-year graduation rate has increased by 8.7 percentage points over the past twenty years. However, these gains have been distributed unevenly among groups. White and Asian students had the largest increases over this time. Since the 1987 entering cohort, the graduation rate for white students has increased 12.3 percentage points, to 75.4% from 63.1%. Similarly, Asian students have seen an increase in graduation rates to 76.0% from 67.2% (8.8 percentage points). The African American graduation rate has increased over the last five years to 43.8% for the 2007 cohort from 39.4% for the 1987 cohort (4.4 percentage points). Most notably, graduation rates for Hispanic students have seen the largest growth over the last 20 years with a growth of 15.8 percentage points, to 68.3% from 52.5%.

For the third year in a row, both female and male students experienced slight decreases in the six-year graduation rates. While the graduation rate gender gap has gradually closed over the past decade, women continue to lead in both college enrollments and graduation rates. Among students first enrolling in 2007, 66.1% of females graduated within six years while only 61.1% of males did the same. However, second year retention rates are almost equal, as the female retention rate for the 2012 entering cohort is 82.8% compared to the male rate of 82.7%.

At 82.8%, the statewide second-year retention rate was the highest it has ever been, exceeding the previous highest rate of 82.6% for the 2001 cohort. Sustained retention rate increases should result in higher graduation rates over the next several years. Although racial and gender gaps still persist, long-term trends suggest that Maryland's higher education system has made strides to close these gaps and to improve the rate at which students progress through college.

The 2012 cohort (13,566 students) is the smallest since 2003. After reaching a peak of 15,100 full-time entering students in 2008, cohort sizes have continued to shrink each year. A smaller cohort size presents the State with both opportunities and challenges. As first-time, full-time cohorts shrink institutions should improve their efforts to retain these students, as well as increasing enrollment and retention of part-time students, in order to continue growing in size. Improved retention rates should lead to improve graduation rates, and greater efforts to support part-time students may improve their completion rates as well. Moreover, the success of Maryland's 2025 degree completion goal is dependent on both increased enrollment and higher graduation rates.

## STATEWIDE TRENDS IN RETENTION AND GRADUATION RATES

# Trends in Retention and Graduation Rates

\* 2010 Cohort sizes have been updated to include UMUC in the total.

\*\* New federal race and ethnicity definitions were introduced in 2010. Figures before and after 2010 may not be directly comparable
