EXECUTIVE SUMMARY

This report presents data on the retention and graduation rates of first-time, full-time undergraduate students entering public four-year colleges and universities in the state of Maryland from 1989-2014. In addition, the retention rates for Maryland state-aided independent institutions are presented.

Of the 14,666 students who enrolled as first-time, full-time students at public four-year institutions in fall 2009, 66.1% graduated in six years. This is the highest six-year graduation rate on record.

The second-year retention rate for the 2014 cohort is 83.8%, a slight decrease of 1.3 percentage points compared to the 2013 cohort. While the retention rate for the 2014 cohort is less than it was for the 2013 cohort, the 2014 rate is the second highest rate in the last 20 years, and the increase from the previous year was the second highest year-to-year increase in that period. The number of first-time, full-time students in the 2014 cohort (14,074) at public four-year institutions is the highest since the 2010 cohort.

INTRODUCTION

This report presents data on the retention and graduation rates of first-time, full-time undergraduate students who initially enroll at public four-year colleges and universities in the state of Maryland. The graduation trends in this report include undergraduate students who persisted at and graduated from the campus at which they initially enrolled, as well as those who transferred to and then graduated from any of the four-year colleges or universities, including independent institutions, in Maryland. This analysis features six-year graduation rates, or the percentage of students who receive a bachelor's degree within six years of initial enrollment. The four- and five-year graduation rates are included in the tables beginning on page 13. The retention rates in this report include the percentage of first-time, full-time students who remained enrolled at the same institution in subsequent fall semesters.

The highlights of the new data presented in this report include the six-year graduation rate for the 2009 cohort, which measures the percentage of students who entered higher education institutions in fall 2009 and graduated before fall 2015, and the second-year retention rate of the 2014 cohort, which measures the percentage of students who enrolled in higher education for the first time in fall 2014 and were still enrolled in fall 2015. New data presented also include the persistence rates for the 2010 through 2013 entering cohorts of undergraduate students, five-year graduation rates for the 2010 cohort, and four-year graduation rates for the 2011 cohort. These data are disaggregated by gender, racial/ethnic group, and institution. Cohorts are defined by year of entry (first-time enrollment).

Data on race/ethnicity for the 2010 to 2014 cohorts reflect new race coding. The new race coding counts a student reporting more than one race as Two or More Races regardless, of whether one of the reported races is white. Students identified as Hispanic or Non-Resident Alien are always counted in those categories regardless of other responses.

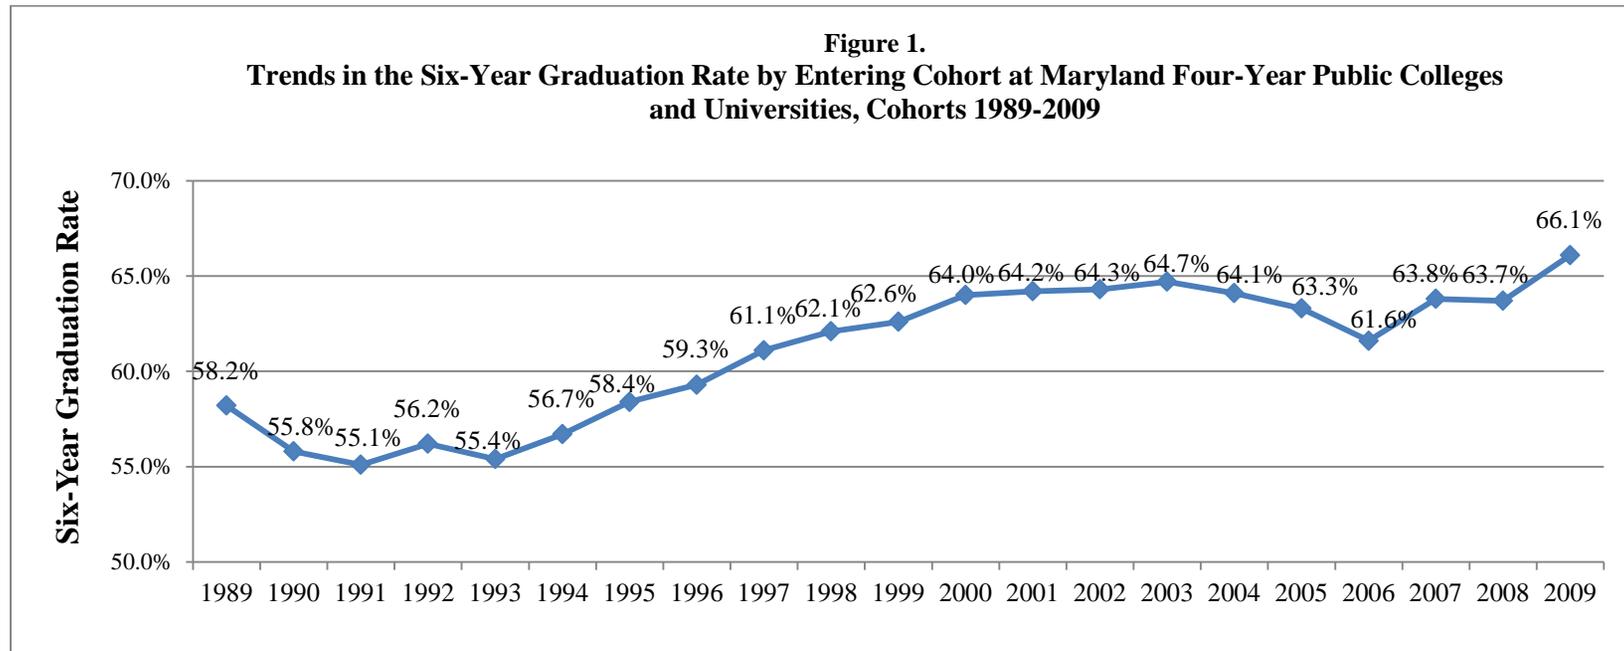

All data in this report come from MHEC's Enrollment and Degree Information Systems, unless otherwise noted.

ANALYSIS AND DISCUSSION

Maryland Four-Year Public Institutions

Six-Year Graduation Rates for All Students

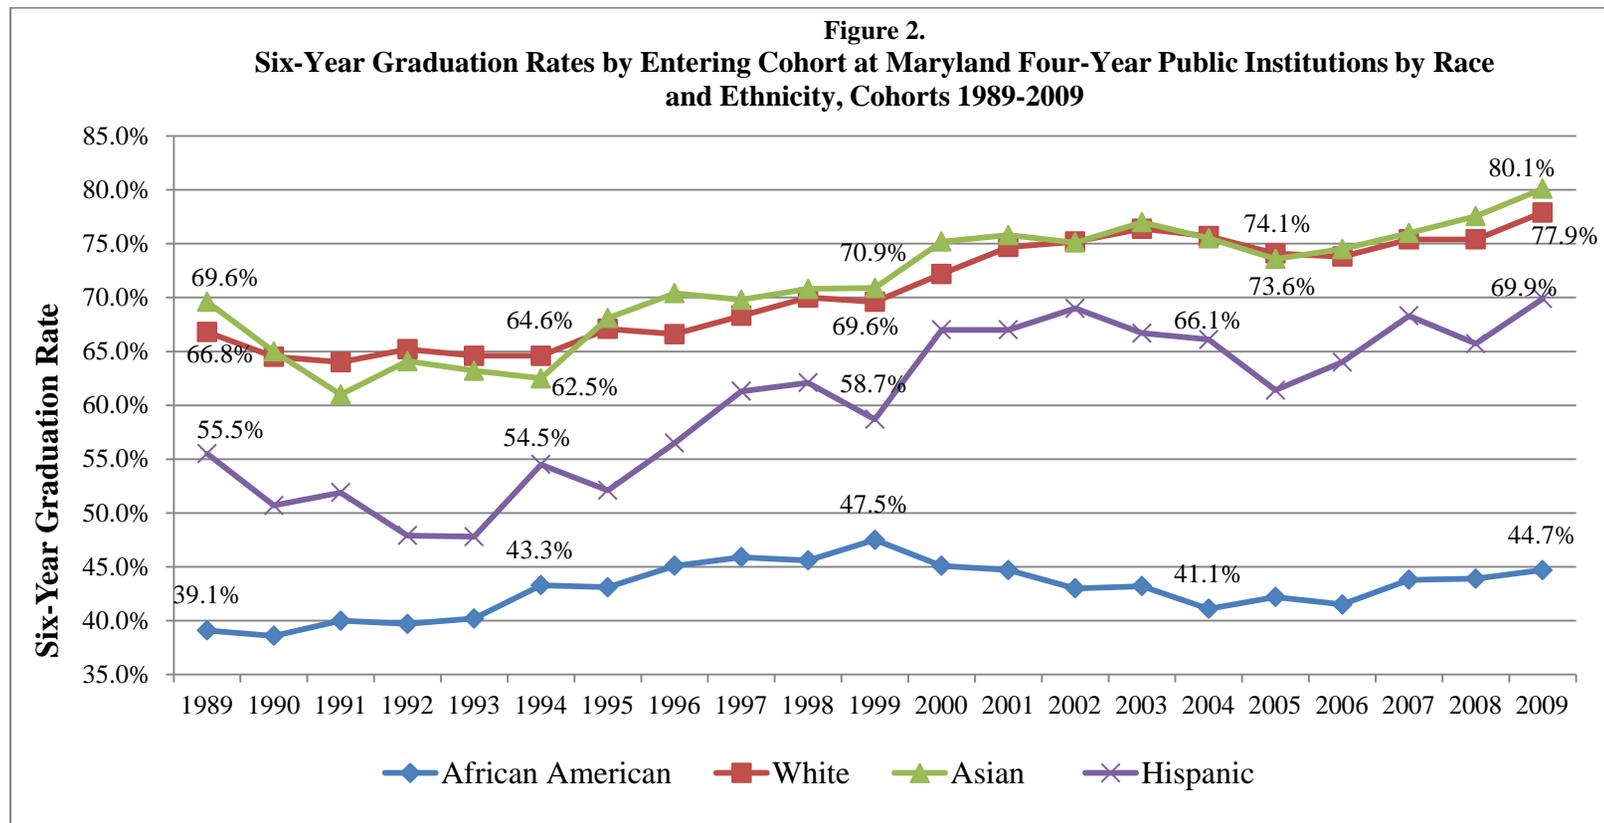

The six-year graduation rate for first-time, full-time students increased to 66.1% for the 2009 cohort compared to 63.7% for the 2008 cohort (see Figure 1). The 2009 cohort of students had the highest statewide six-year graduation rate, and the largest year-to-year increase on record. This cohort of students also had the highest five-year graduation rate on record with a 3.8 percentage points increase over the five-year graduation rate of the 2008 cohort.

As shown in the detailed tables accompanying this report, when compared to the 2008 cohort, six-year graduation rates for the 2009 cohort were slightly lower at five institutions, but six institutions included in this report had higher six-year graduation rates. Among four-year public institutions, the following institutions had the highest six-year graduation rates for the 2009 cohort: University of Maryland College Park (86.3%), St. Mary's College of Maryland (83.2%), and Towson University (74.1%).

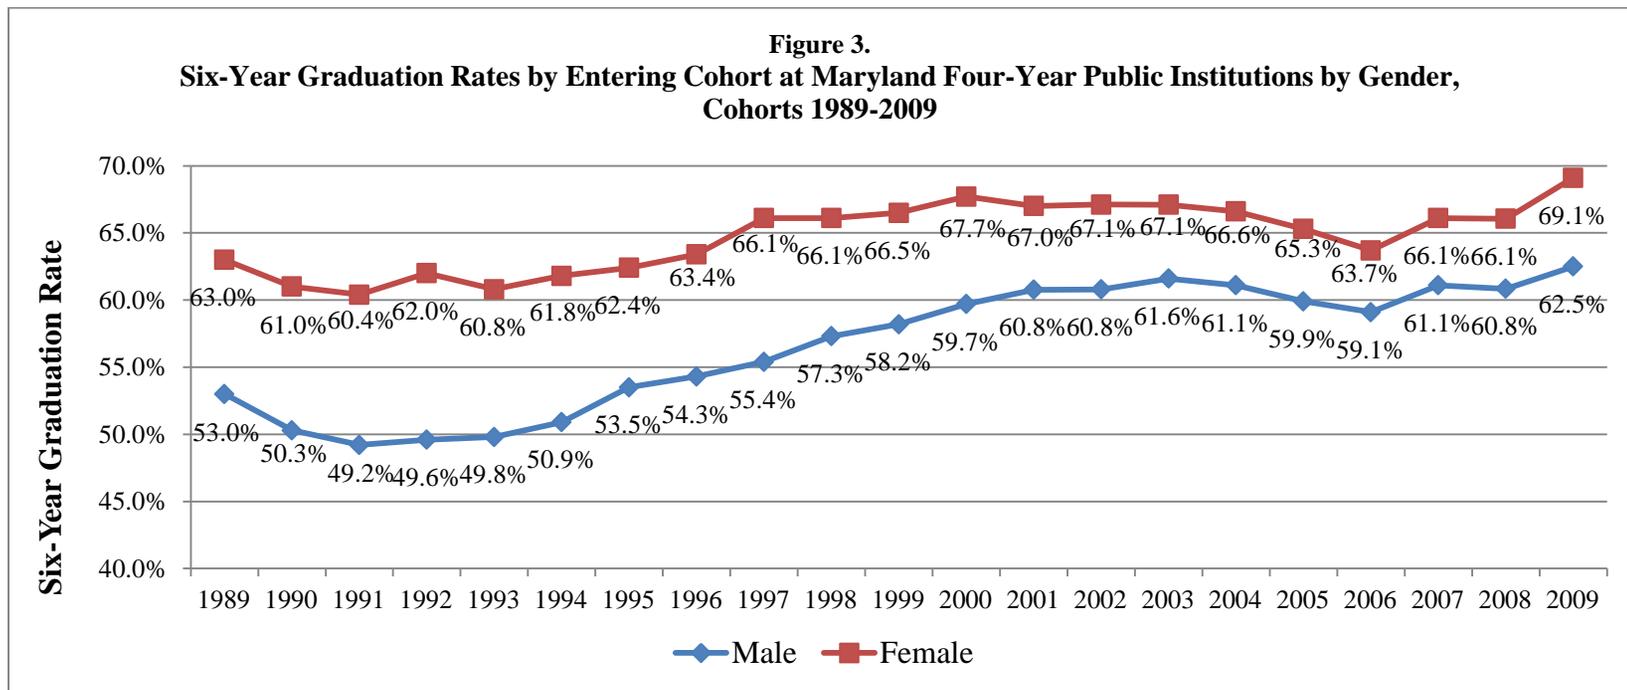

Graduation Rates by Race and Ethnicity

Graduation rates for students of every race/ethnicity are higher than they were 20 years ago (see Figure 2). Statewide graduation rates were higher for Asian (80.1%) and white (77.9%) students than students of other races/ethnicities. The six-year graduation rates for both Asian and white students in the 2009 cohort have increased by roughly three percentage points over the previous cohort, and are the highest graduation rates on record for these groups. The graduation rate for the 2009 cohort of Hispanic students increased the most of the reported races, from 65.7% in 2008 cohort to 69.9%, giving the Hispanic students in this cohort the highest six-year graduation rate in the past 20 years. The six-year graduation rate for African American students increased slightly from 43.9% for the 2008 cohort to 44.7% for the 2009 cohort. However, the graduation rate for African American students peaked at 47.5% in 1999, and has not returned to that level since that time.

Graduation Rates by Gender

As shown in Figure 3, the six-year graduation rates for male and female students in the 2009 cohort was the highest it has ever been. The graduation rate for females in this cohort was 69.1%, three percentage points higher than last year’s rate of 66.1%. The graduation rate for male students also increased from 60.8% to 62.5%. The gap between male and female students in Maryland has gradually narrowed since the 1990s. At its highest point (in 1992), the gap between male and female students was 12.8 percentage points. This gap has narrowed significantly over the years, and stands at 6.6 percentage points for the 2009 cohort. This is consistent with the national trend, where six year graduation rates for male students at public institutions trail those of their female peers by approximately 6.0 percentage points.¹

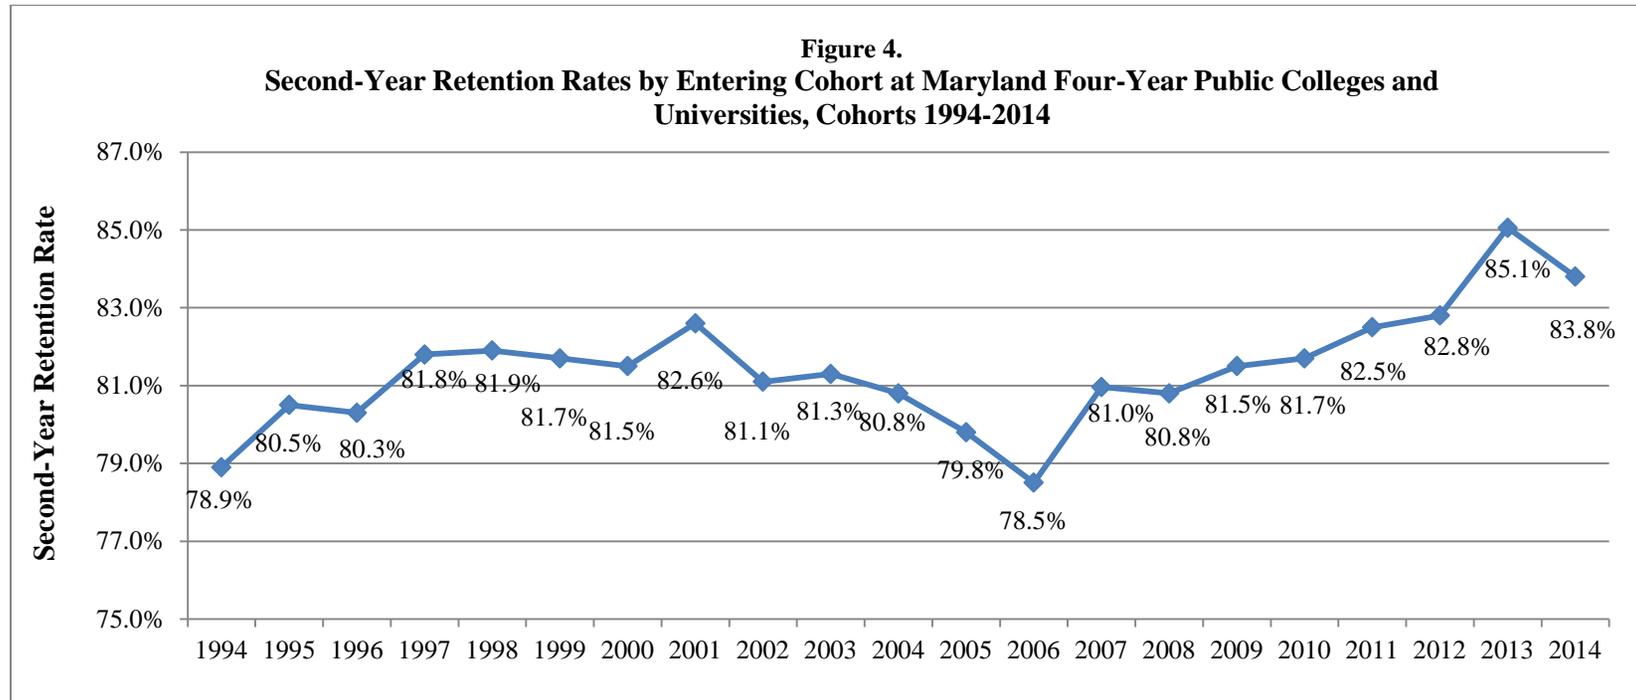

¹ U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Winter 2014–15 Graduation Rates component. See *Digest of Education Statistics 2015*, table 326.10. http://nces.ed.gov/programs/coe/indicator_ctr.asp

As shown in the detailed tables accompanying this report, the gender gap is largest for African American and Hispanic students. The six-year graduation rate for African American male students in the 2009 cohort was 38.9%. In contrast, the graduation rate for African American female students in the 2009 cohort stood at 48.5% (a difference of 9.6 percentage points). The gender gap is even larger for Hispanic students (at 12.2 percentage points), with Hispanic males having a six year graduation rate of 63.5%, and females having a graduation rate of 75.7%. Some of the variance in these rates may be due to a relatively small student population: the 2009 cohort included 296 Hispanic females and 263 Hispanic males; in comparison, there were 2,853 African American females and 1,890 African American males. Nationally, the achievement gap between African American female and African American male students has averaged 9.6 percentage points between 2002 and 2008; this gap was 8.1 percentage points for Hispanic females and Hispanic male students.²

(This table was prepared December 2015.) http://nces.ed.gov/programs/digest/d15/tables/dt15_326.10.asp?current=yes.

Second-Year Retention Rates for All Students

The second-year retention rate for first-time, full-time undergraduates at public institutions in Maryland was 83.8% for the 2014 cohort (Figure 4). This represented a decrease (1.3 percentage points) from the previous cohort, which saw a historically high retention rate of 85.1%. Nevertheless, the retention rate of the 2014 cohort is the second highest ever, and continues a long-term growth trend since the 2006 cohort. Prior to 2011, the only cohort with a retention rate above 82% was the 2001 cohort; with the 2014 cohort, the statewide retention rate has now exceeded 82% for four consecutive years.

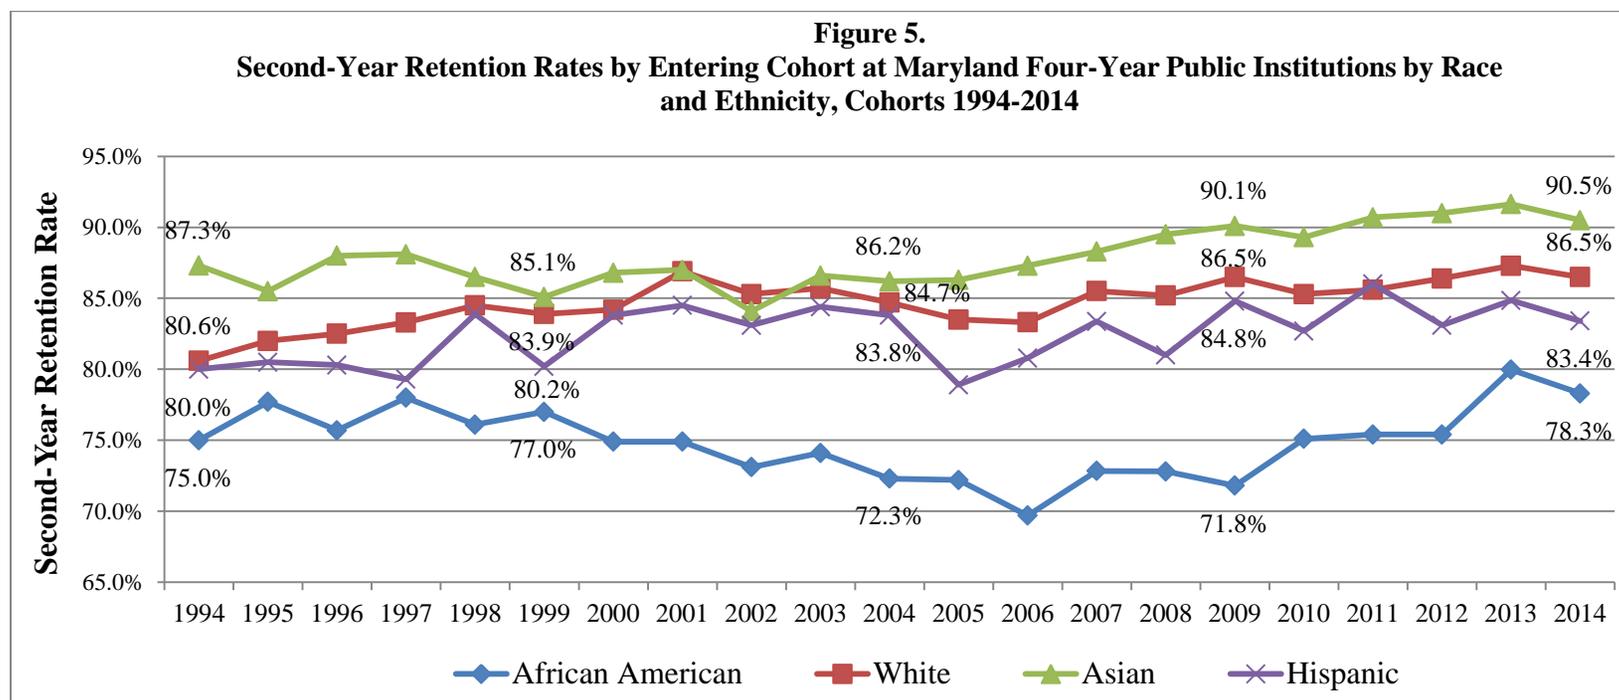

Seven institutions had a retention rate that exceeded 75%, and as shown in the tables that accompany this report, four institutions saw increases in the second-year retention rates of their students; these increases ranged from 0.3 to 2.2 percentage points. The institutions with the highest retention rates in this cohort were the University of Maryland, College Park (95.3%); the University of Maryland Baltimore County (85.9%); Towson University (85.7%), St. Mary’s College of Maryland (85.7%), and Salisbury University (81.8%).

Four institutions returned to 2012 levels after seeing an increase in 2013: Bowie State University, the University of Baltimore, the University of Maryland, Baltimore County, and the University of Maryland Eastern Shore. Three other institutions held steady between 2012 and 2014: Frostburg State University, Salisbury University, and Towson University. But four institutions maintained the increases that they saw in 2013: Coppin State University, Morgan State University, St. Mary's College of Maryland, and the University of Maryland, College Park. Morgan State's performance was noteworthy because the number of students in the cohort increased by 172 students (19.4%). Coppin State's rate increased while also seeing a decline of 88 students (24.8%).

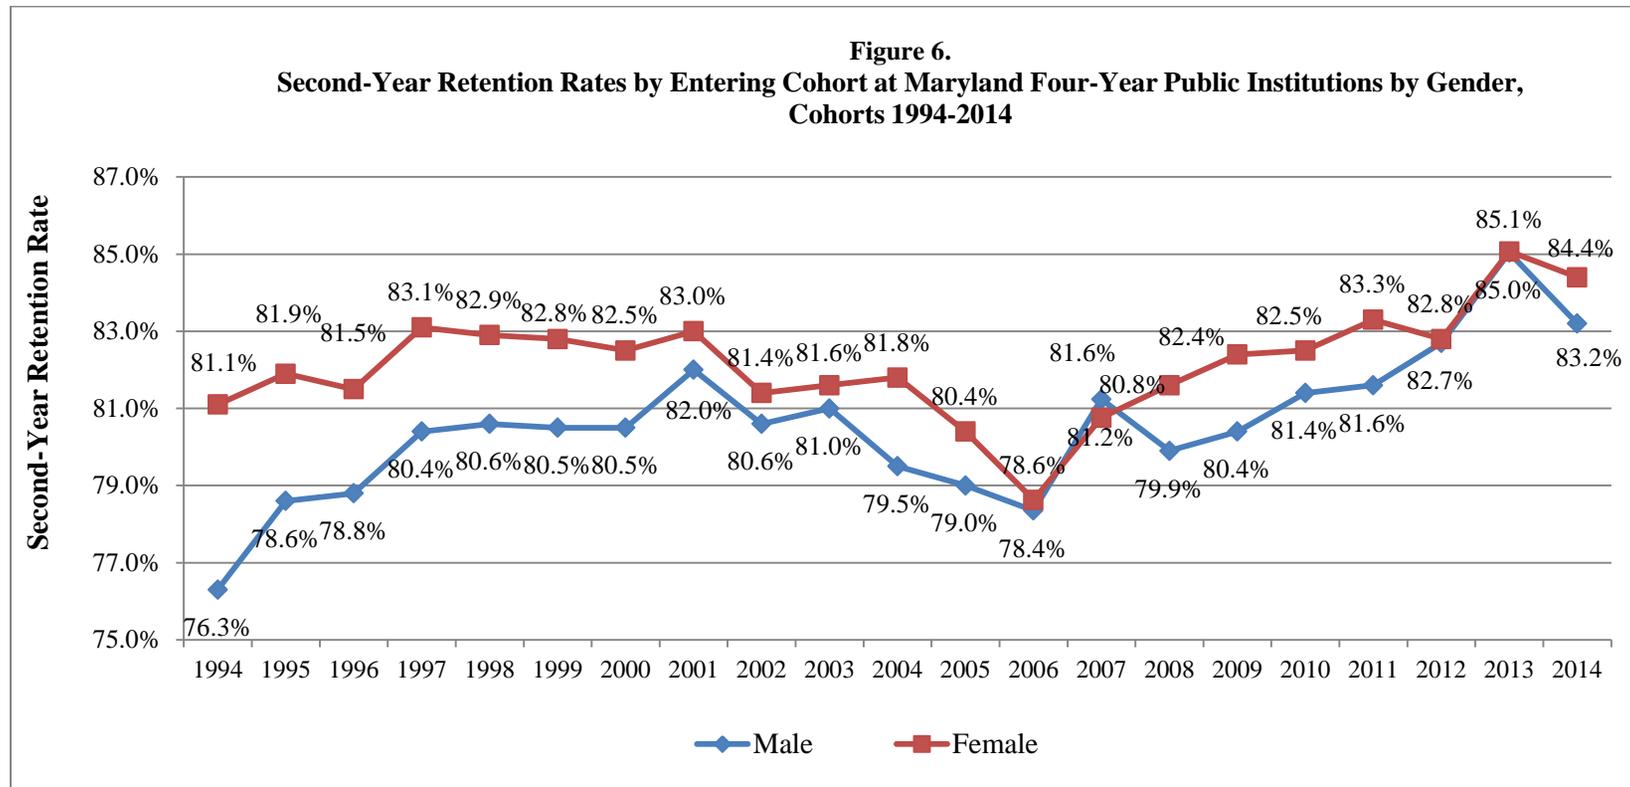

Second-Year Retention Rates by Race and Ethnicity

Figure 5 illustrates the second year retention rates for students of the largest racial and ethnic groups. As they have for more than a decade, Asian students achieved the highest second-year retention rate (90.5%) among all racial and ethnic groups. The retention rate for Asian students declined slightly, however, from 91.6% in the previous year (a difference of 0.4 percentage points); the rates for white, Hispanic and African students also declined. For white students, the second-year retention rate for the 2014 cohort was 86.5% (down by 0.8 percentage points from the previous year). For Hispanic students, the second-year retention rate declined from 84.8% for the 2013 cohort to 83.4% for the 2014 cohort (a difference of 1.4 percentage points). The second-year retention rate for African American students in the 2014 cohort also declined (by 1.7 percentage points) to 78.3% from the previous cohort (80.0%). In comparison to the decline in the statewide retention rate (1.3 percentage points), Hispanic and African American students saw a larger decline in their retention rates while Asian and white students had smaller declines.

Second-Year Retention Rates by Gender

Female students have consistently attained higher second-year retention rates than their male peers, except for the 2007 cohort. In the 2012 and 2013 cohorts there was virtually no gap between the retention rates of male and female students. However, in the 2014 cohort, the retention rate for female students was 1.2 percentage points higher than the rate for male students (see Figure 6). The female retention rate was 84.4% in 2014 and the male retention rate was 83.2%.

Maryland State-Aided Independent Institutions

As noted in the 2015 edition of this report, beginning with the 2013 cohort, there were some important changes in the way that MHEC collects student level data from state-aided independent institutions. Most importantly, independent institutions must now use the same type of student identification number as public institutions and must use the same identification number for all data reporting on an individual student. Because many students were reported with different identification types before and after the change, we cannot report reliable retention and graduation data for those students who enrolled in a cohort before 2014. Consequently, MHEC has decided to begin reporting again with the 2014 cohort. The retention rates for the 2014 cohort at independent institutions appear on page 99 of this report. In subsequent editions of this report, an additional year of data will be added, until six-year graduation rates for independent institutions will again be presented.

The statewide retention rate for independent institutions was 82.1% for the 2014 cohort. This will serve as a baseline for reporting on conditions at independent institutions in future editions of this report.

CONCLUSION

The six-year graduation rate for the 2009 cohort at Maryland public institutions is the highest on record. The rate for the 2008 entering cohort of students was 66.1%, 2.4 percentage points higher than the rate for the 2008 cohort. Statewide, the six-year graduation rate has increased by 7.9 percentage points over the past twenty years. However, these gains have been distributed unevenly among groups. Hispanic students have seen the largest growth over the last 20 years with a growth of 14.4 percentage points, (at 66.9% up from 55.5%). In comparison, over that time period, the African American graduation rate has increased by 5.6 percentage points (44.7% up from 39.1%). This is the smallest growth among the racial/ethnic groups reported. Growth in the graduation rates for white students was slightly higher than the growth in the rates for Asian students (11.1 percentage points versus 10.5 percentage points, respectively, over 20 years).

Among students first enrolling in 2009, 69.1% of females graduated within six years while 62.5% of males did the same. Although achievement gap between male and female students in the 2009 cohort was larger than for the 2008 cohort, the 2009 graduation rates are the highest ever achieved by both groups. At 84.4%, the second-year retention rate for females in the 2014 entering cohort was also higher than the rate for males (83.2%).

The statewide second-year retention rate for the 2014 cohort of students was 83.8%. This rate was the second highest on record, and it trails the retention rate of the 2013 cohort (the highest rate ever achieved) by 1.3 percentage points. It remains to be seen whether retention rate increases will be sustained in the next several years. Although racial and gender gaps still exist, long-term trends suggest that Maryland's higher education institutions are making strides to close these gaps and to improve the rates at which students progress through college.
