4. Retention and Graduation Rates of Maryland Residents at State-Aided Maryland Independent Institutions, 2004 - 2007 Cohorts	79

Introduction

This report contains the retention and graduation patterns of full-time undergraduate students entering Maryland's public four-year colleges and universities from 1987 to 2007. Specifically, it looks at the number and percentage of students who were retained at their original public four-year campus and those who graduated from any senior public college or university in the State.¹ Utilizing this approach, a student who matriculated at one of the thirteen Maryland public four-year institutions but transferred to, and subsequently graduated from, a different Maryland institution (public or independent) would still count toward the graduation rate of the originating institution, regardless of the amount of time spent at either institution.

Figures for the entering class of 1996 and beyond include the following changes which resulted from the development of the Federal Graduation Rate Survey (GRS):

- Retention rates of all first-time undergraduates, and not just first-time *freshmen*, are included. This allows for the inclusion of students who are first-time college students but, through advanced placement or other early credit-granting means, have accumulated enough college credits to enter above freshman standing.
- Students who are enrolled at multiple institutions are included more than once in the cohort. Prior to the 1996 cohort, these cross-enrolled students were reported at only one campus on a randomly selected basis.
- If an institution reports a new social security number for a student, the student is tracked on the basis of the new number. In earlier cohorts, these students were treated as having dropped from the institution. The impact of this change is greatest at institutions with a large number of foreign students, who are often assigned "dummy" social security numbers when they initially enroll.
- The method used to match student enrollment and degree attainment is based on the federal GRS procedures and on the recommendations of an intersegmental workgroup.

Information on cohorts from previous years remains unchanged. There are no significant policy changes in Maryland's data resulting from GRS.

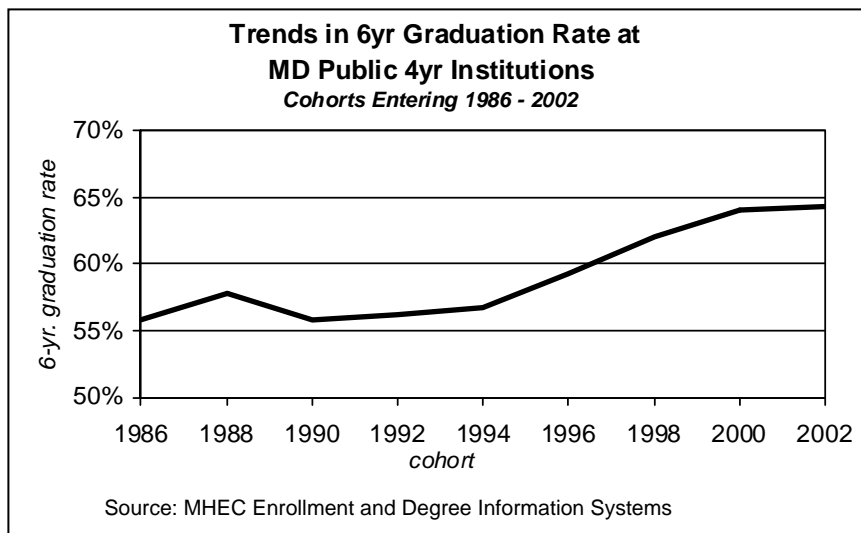

Statistics for the public institutions include all first-time, full-time students, regardless of residency, however this report also includes Maryland residents who enrolled at a public institution between 1998 and 2007 and who subsequently transferred to a Maryland state-

¹ While included in the aggregate statewide tables, individual institution data for the University of Baltimore, the University of Maryland, Baltimore and the University of Maryland University College have been excluded. The University of Baltimore is excluded because it currently enrolls very few first-time students. The University of Maryland, Baltimore is excluded because it does not enroll first-time students. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

aided independent college or university. Nearly all of the independent institutions began providing the Commission with unit record information about the enrollment and degree achievement of new full-time students who are Maryland residents beginning in fall 2004.

Maryland Public Institutions: Six-Year Graduation Rates

- The six-year graduation rate for the most recent cohort of all new full-time students is at an **all time high** of 64.3 percent. The six-year rate, while increasing just one-tenth of a percentage point from last year, has risen for nine consecutive cohorts (starting from 55.4 percent in 1993). The public institutions with the highest six-year graduation rates for the entering class of 2002 were UMCP (82.1 percent), St. Mary's (80.9 percent), Salisbury (74.9 percent) and Towson (70.4 percent). Bowie, Towson, UMBC and UMCP experienced historic highs in their six-year graduation rates.

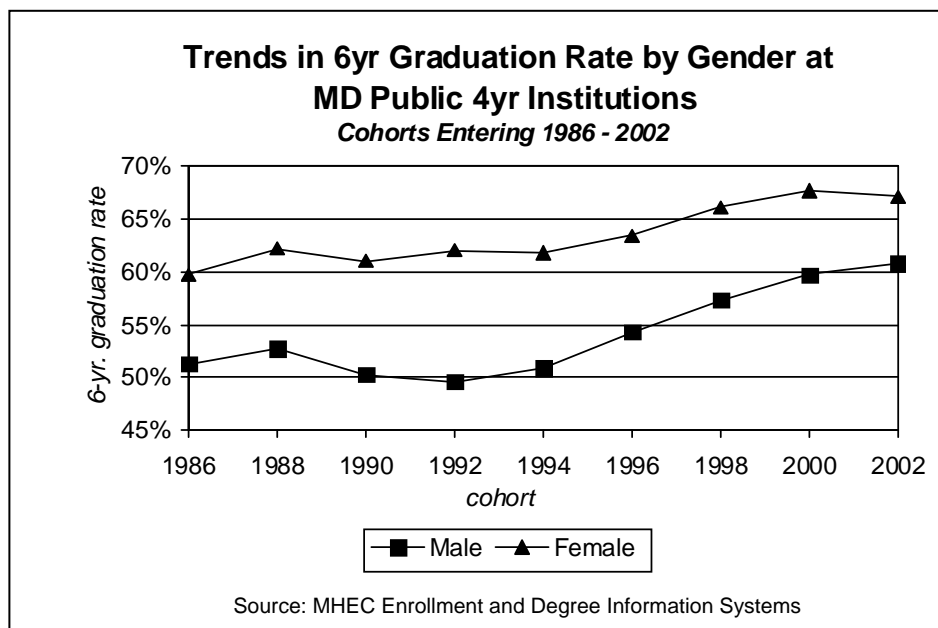

- The 2002 entering cohort of Hispanic (69 percent) and white (75.2 percent) students set **all time highs** for six-year graduation rates. Following last year's record high, the graduation rate for Asians decreased by 0.7 percentage points, and the rate for African-Americans (43 percent) decreased for a third consecutive year and reached its lowest point in seven years.

	1987	1992	1997	2002
All Students	56.3%	56.2%	61.1%	64.3%
African-Americans	39.4%	39.7%	45.9%	43.0%
Asians	67.2%	64.1%	69.8%	75.1%
Hispanics	52.5%	47.9%	61.3%	69.0%
Whites	63.1%	65.2%	68.3%	75.2%

Source: MHEC Enrollment and Degree Information Systems

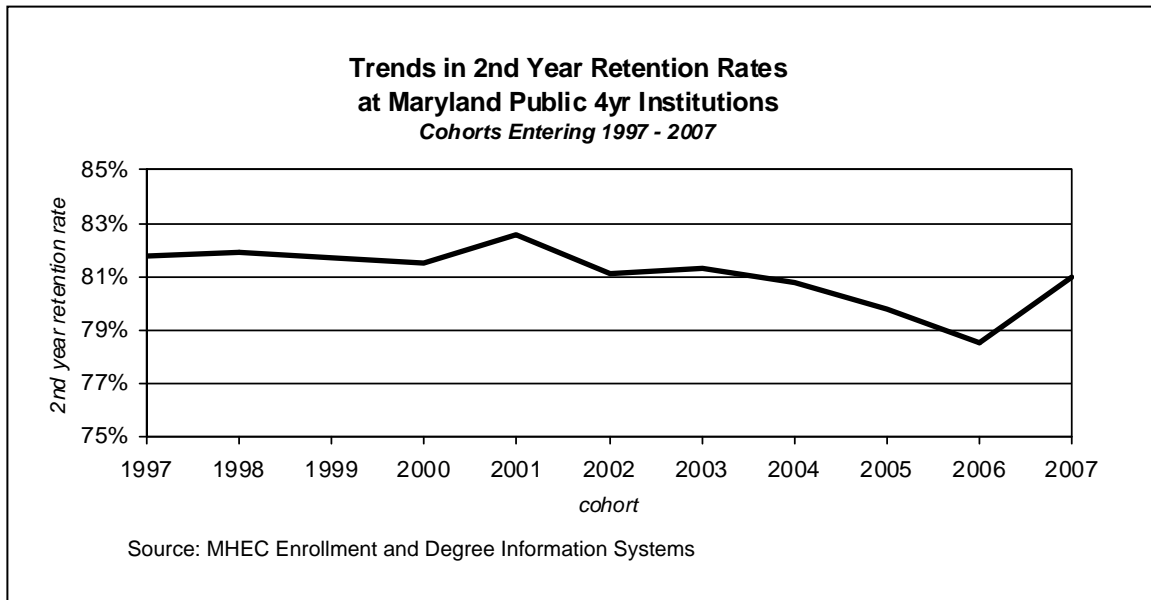

- Once again, Asian students had the highest six-year graduation rate of any racial/ethnic group.
- For the third year in a row, and just the fifth time in the past 17 years, the six-year graduation rate for Hispanic students exceeded the overall graduation rate.
- The four-year public institutions that had the highest six-year graduation rates for African-American students in the 2002 cohort were Towson (69.9 percent), UMCP (68.3 percent), Salisbury (64.3 percent) and UMBC (62.2 percent). This also marks the third straight year that UMCP achieved a record-high graduation rate for African Americans.
- Towson, the university with the highest overall six-year graduation rate for African Americans, had the smallest six-year graduation rate gap between African-Americans and the total cohort (0.5 percentage points) of all as well as the smallest gap between African-American and white students (2.4 percentage points).
- In some cases, even institutions with notable graduation rates for African American students experienced considerable gaps between their overall rate and their African American rate. The differences between the overall and African American six-year graduation rates were largest at St. Mary's (23.3 percentage points) and UMCP (13.8 percentage points).
- The six-year graduation rate for the 2002 cohort of male students tied last year's all-time high of 60.8 percent, while the rate for women increased slightly to 67.1 percent (up just one-tenth of a percentage point from last year).

- Since the Commission began collecting these statistics, the graduation rate for women has been higher than the rate for men. However, over the last ten years, the gap between men and women has decreased by almost half; from 12.4 percentage points in 1992 cohort to 6.3 percentage points in 2002.
- The six-year graduation rate for African-American men decreased for the third straight year, dropping 1.3 percentage points to 36.2 percent, while the rate for African-American women slipped two percentage points to 47.1 percent.

Maryland Public Institutions: Second Year Retention Rates

- The second-year retention rate for all full-time, first-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 81 percent for the 2007 cohort.

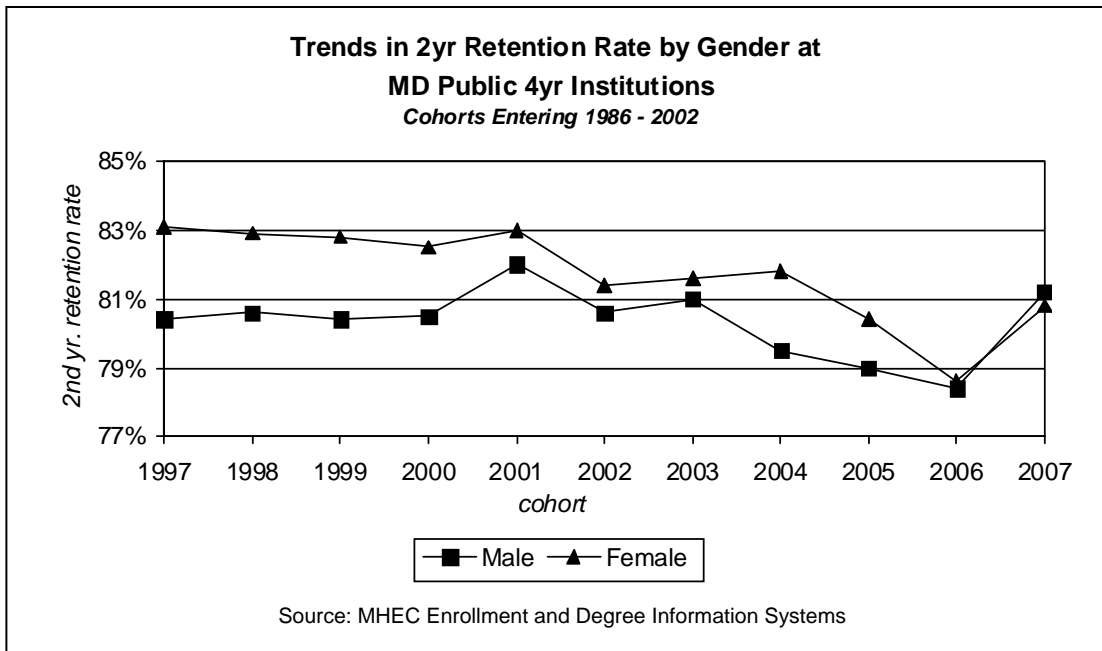

- The institutions with the highest second-year retention rates were UMCP (93.7 percent), St. Mary's (89.2 percent), and UMBC (86.8 percent).
- Six public 4-year institutions experienced gains in their second-year retention rate for the 2007 cohort when compared to the rate for the 2006 cohort: Frostburg (6.9 percentage points), Morgan (6.7 percentage points), UMBC (2.4 percentage points), Salisbury (2.1 percentage points), UMCP and UMES (both increasing by 1.3 percentage points).

Trends in 2nd Year Retention Rates at MD Public 4yr Institutions by Ethnic Group					
	1987	1992	1997	2002	2007
All Students	77.7%	78.6%	81.8%	81.1%	81.0%
African-Americans	68.8%	76.3%	78%	73.1%	72.8%
Asians	84.3%	86.4%	88.1%	84.1%	88.3%
Hispanics	81.3%	77.4%	79.3%	83.1%	83.4%
Whites	80.5%	81.4%	83.3%	85.3%	85.5%

Source: MHEC Enrollment and Degree Information Systems

- Asian students had the highest second-year retention rate (88.3 percent) of all racial/ethnic groups. This marks both a record high, and the third consecutive increase in the second-year retention rate for Asians.
- The second-year retention rate for Hispanic students increased for the second straight year to 83.4 percent, up from 80.8 percent for the previous cohort.
- The second-year retention rate also increased for African-Americans (3.1 percentage points) and whites (2.2 percentage points).
- The second-year retention rate for African-American students in the 2007 cohort was highest at UMCP (95.2 percent), St. Mary's (90.7 percent), and UMBC (80.5 percent). The second-year rates for African-American students at Frostburg, Towson, UMBC and UMCP exceeded those of whites.
- Since the Commission began collecting second-year retention data at the statewide level the retention rate for women has always exceeded the rate for men.. Although just 0.4 percentage points separated the retention rates of men and women in the 2007 cohort, this marks the first time that the men's rate exceeded the women's rate. The second-year retention rate for men was 81.2 percent while the rate for women was 80.8 percent.

- Among African-American students, females continue to achieve higher second year retention rates than their male peers. While the retention rates for both groups improved, a larger increase on the part of African-American women widened the retention rate gap to 2.2 percentage points (up from 0.8 percentage points last year). The second-year retention rate for African-American women rose 3.7 percentage points to 73.7 percent while the rate for men increased by 2.3 percentage points to 71.5 percent.

Maryland Residents at Maryland State-Aided Independent Institutions: Four-Year Graduation Rates

For the first time, graduation rate data is available for Maryland residents who began their academic pursuits at a Maryland independent institution. These data report on full-time, first-time students in the 2004 entry cohort at a Maryland independent institution. Earlier in this report, six-year graduation rates were discussed for Maryland's public institutions. However, since six-year graduation rate data will not be available for the independent schools for another two years, it is important to remember that any graduation rate comparisons between independent and public institutions concern *four-year* graduation rates, not the six-year rates as already discussed.

- The four-year graduation rate for the 2004 cohort is 53.8 percent. This is over 15 percentage points higher than the four-year graduation rate of all new, full-time students at Maryland public four-year institutions. The independent institutions with the highest four-year graduation rates for the entering class of 2004 were Johns Hopkins (80.4 percent), Maryland Institute College of Art (73.1 percent) and Goucher (71.4 percent).

- The four-year graduation rate for African-Americans at Maryland's independent institutions is only half of the rate for the independents' white students. The four-year graduation rate for new, full-time African-Americans is 30.8 percent while the rate for whites is 61 percent.
- Women have a higher four-year graduation rate (55.5 percent) than men (50.7 percent).

Maryland Residents at Maryland State-Aided Independent Institutions: Second-Year Retention Rates

- At Maryland's independent institutions, the second-year retention rate of all full-time, first-time undergraduate Maryland residents returning to their original campus after one year fell 4.3 percentage points to 75.4 percent for the 2007 cohort. In the four years that this data has been available, this marks the lowest rate among the independent institutions. Second year retention rates of Maryland residents at Loyola (89.6 percent), McDaniel (86.4 percent) and Maryland Institute College of Art (85.5 percent) exceeded those at the other State-aided independent institutions in Maryland.
- The second-year retention rate for African-American Maryland resident undergraduates fell by almost 10 percentage points to 61.8 percent (down from 71.4 from the 2006 cohort). The second-year retention rates of African American Maryland residents at Johns Hopkins (92.6 percent), Mt. St. Mary's (86.7 percent), Hood (84.0 percent) and Loyola (82.6 percent) exceeded those for African American Maryland residents at the other State-aided independent institutions in Maryland.
- For the second straight year, the second-year retention rate for women (76.3 percent) exceeded that for men (73.6 percent) among Maryland residents at state-aided independent institutions.
- Even though the second-year retention rates decreased for both genders compared to those of the 2006 entry cohort, the gender gap increased from just one percentage point to 2.7 percentage points.

Conclusions

The statewide six-year graduation rate has increased continuously for the last nine years. During that time, the graduation rate increased by almost nine percentage points, growing from 55.4 percent for the cohort entering in the fall of 1993 to 64.3 percent for the 2002 entering class. During this same time, the size of the entering cohorts increased by almost 3,500 new full-time undergraduates, eventually resulting in over 3,000 additional graduates; a growth yield of just over 85 percent.

Even in circumstances where graduation rates have declined, the end result has not necessarily been a decline in the actual number of graduates. For three straight years the six-year graduation rate has declined for African-Americans. And yet, even with a decline

in the *rate* of graduation after six years, the cohort of new, full-time African-American students who started in the fall of 2002 graduated 100 more *students* (1,708) than did the cohort that entered in 1999, which, to that point, was a record high year for African-American six-year graduation rates, and was also the year just before the three years of declining rates began.

The success gap between white and minority students has continued in Maryland, and this trend is consistent with findings at the national level. Nationally, as in Maryland, the only minority group to consistently outperform white students is Asian students. Hispanic students in Maryland, though, seem to graduate at rates closer to those of their white counterparts than do Hispanics throughout the United States overall. Nationally, Hispanics tend to graduate at rates that are 12 percentage points, on average, lower than the graduation rates for white students. In Maryland, however, for the entry cohorts between 1997 and 2002, the average six-year graduation rate gap between Hispanic and white students was just 7.5 percentage points.

The graduation rate for students in the 2002 entry cohort who attended Maryland's historically black institutions (HBI's) was lower than the rates of students who attended other public four-year institutions. It is important to note, however, that this pattern is consistent with national trends. The high percentage of African-American students attending HBIs, coupled with the large proportion of low-income students enrolled and their less rigorous admissions requirements may explain the lower graduation rates achieved by students at these universities.

In the latest "Measuring Up" report card, Maryland ranked 1st in the nation for graduating white students in six years, and tied for second for its graduation rates for Hispanic students. However, the graduation rate gap between Maryland's white and black students is more considerable, and the state ranked 17th in the nation for its six-year graduation rate for African-Americans. Clearly there is more work to be done to encourage and promote high achievement levels among Maryland's African-American students and to bring their success rates into greater alignment with the rest of the students in the State. But it is also important to remember that, while the State and its institutions should always be working to close the success gaps that separate some groups of students from others, Maryland is among the top 5 states, nationally, in terms of bachelor's degree production.
