Ten-year trends in the retention, transfer, and graduation of first-time, full-time Maryland public community college students are presented in this report. Tables track students two, three, and four years after matriculation and are broken down by gender and ethnic categories. Beginning in 2004, the Commission has been able to track transfers of Maryland residents to Maryland independent institutions, providing a more accurate view of transfer rates. Hence, the 2004 and 2005 transfer figures for students may reflect Maryland residents who transferred to independent institutions.

In recent years, community colleges have expanded their missions, enrolling increasing numbers of students with goals other than earning credentials or transferring. In addition, student completion is impacted by the level of preparation that an individual has upon entry to college. This report contains results from community college non-returning student surveys showing evidence of these phenomena.

Definitions

- **Still Enrolled**- Student was retained at original community college or transferred to another Maryland community college.
- **Graduated/ Did Not Transfer**- Student graduated from a Maryland community college with an associate degree or a lower division certificate and did not transfer to a Maryland four-year institution.
- **Transferred to a 4-Year**- Student transferred to a Maryland four-year institution, with or without degree or certificate.

The Commission cannot track students to out-of-state institutions.

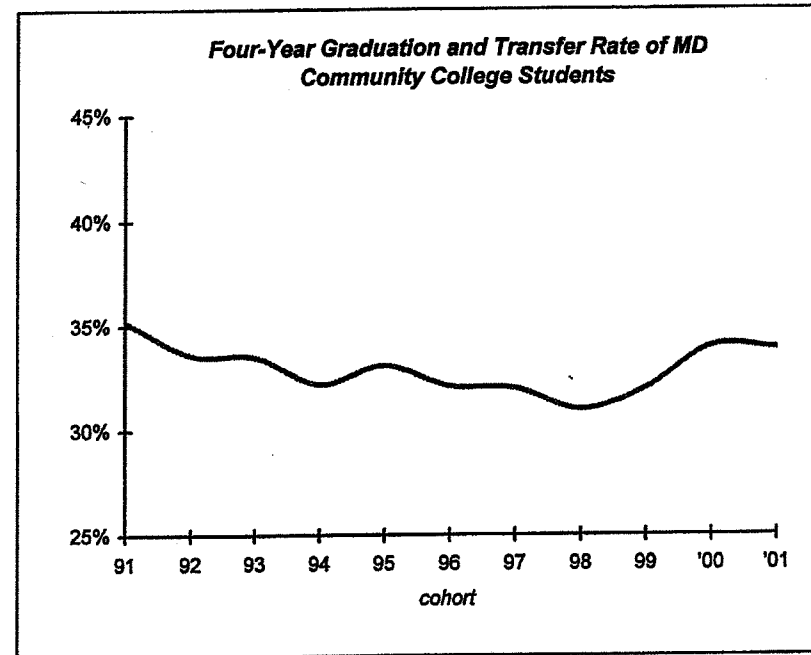

Highlights

All Students

Of the 12,919 new full-time freshmen matriculating in fall 2001, 25.4 percent transferred to a Maryland public or independent four-year college, 8.5 percent graduated and did not transfer, and 10.9 percent were still enrolled in a Maryland community college four years later.

The four-year graduation and transfer rate of new full-time freshmen was 33.9 percent in the 2001 cohort, virtually the same as the previous year.

The Maryland community colleges with the highest four-year graduation and transfer rates for the entering class of 2001 were Carroll (48.2 percent), Howard (41.1 percent), Frederick (39.7 percent), Anne Arundel (39.4 percent), Allegany (39.1 percent), Hagerstown (38.9 percent), and Harford (38.7 percent). Those with the lowest rates were Baltimore City (15.2 percent) and Prince George's (22.8 percent).

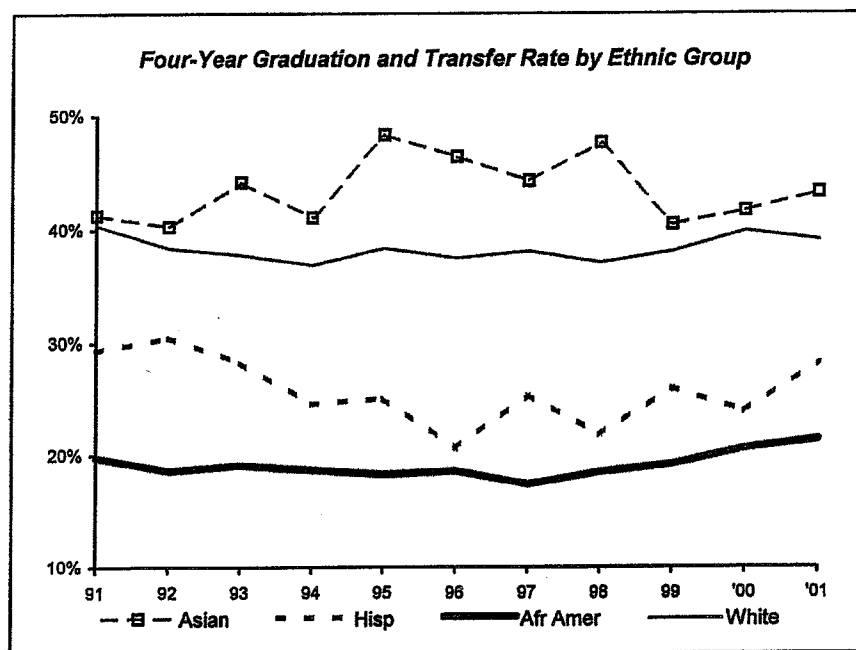

By Gender

Women have consistently achieved a higher four-year graduation and transfer rate from community colleges than men. In the 2001 cohort, the four-year graduation and transfer rate for women was 35.6 percent, compared to 31.8 percent for men. This difference is the widest separation between women and men since the 1998 cohort.

By Ethnic Group

The graduation and transfer rates of African American and Hispanic students have remained well below the rates of whites and Asians. However, the rate for African American students in the 2001 cohort rose this past year to 21.3 percent, the highest on record. The graduation and transfer rate for Hispanic students rose sharply to 28.3 percent, the highest since the 1993 cohort. For white students, the rate dipped slightly to 39.1 in the past year. The graduation and transfer rate of Asian students rose from 41.7 percent to 43.3 percent in the past year, remaining the highest of any group analyzed.

Measuring Outcomes of Students with Educational Goals Other Than Graduation or Transfer

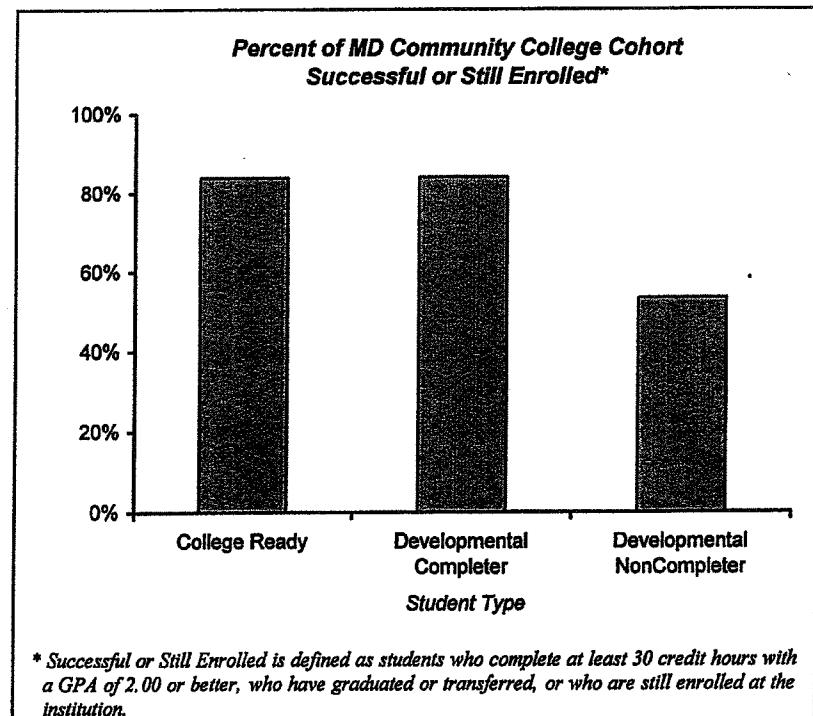

Since 2000, Maryland's community colleges have been surveying students who enroll in one term but do not return in the next. Because the survey asks about students' educational goals, the results provide valuable information about experiences of non-returning students with goals other than earning a degree or certificate or transferring to a four-year college. Of the 2,409 respondents statewide to the 2005 survey, 41 percent enrolled with goals other than earning credentials or transferring. This figure is consistent with those in the previous two surveys. These other goals included updating skills for a current job, preparing for a new or different career, self-enrichment, or learning English as a second language. As an outcomes measure, students were asked whether their goal had been met. In the 2005 survey, of the students with educational goals other than graduation or transfer, 78.9 percent reported that their goals had been met. Individual campus survey results are found in the last section of this report.

A New Way of Looking at Student Progress

The community colleges have initiated a new set of metrics that examines the graduation/transfer rate and the “successful-persister” rate after four years of three groups of students who attempted at least 18 credit hours within two years of matriculation: “college-ready” (those requiring no remedial coursework), “developmental completers” (those who needed remediation in at least one area who, after four years, completed all of the recommended coursework), and “developmental non-completers” (those who needed remediation in at least one area who, after four years, did not finish all of the recommended coursework). The “successful-persister rate” encompasses students who have earned at least 30 credits with a cumulative G.P.A. of at least 2.0, or are still enrolled as well as those who graduated or transferred. This concept is intended to provide interim measures of progress and to capture the outcomes of community college students with goals other than earning a credential or transferring to a four-year institution. The breakdowns on the basis of remedial needs at entry are designed to reflect the differing levels of preparation with which community college students begin their studies.

This information is currently available only for the fall 2000 entering class, but over time longitudinal comparisons will be possible. The total cohort consisted of 14,455 students statewide. For those students for whom information about level of participation was available, 41.2 percent were college-ready, 30.1 percent were developmental completers and 28.7 percent were developmental non-completers. The “successful-persister” rate was very similar for college ready students and developmental completers (84 percent and 84.2 percent respectively) but was considerably lower for developmental non-completers (53.4 percent). The transfer/graduation rate for college-ready students (58.5 percent) and developmental completers (52.7 percent) exceeded the average for all students (47.6 percent). Statistics were not available for developmental non-completers.

* Analysis Cohort = students who attempt at least 18 hours within two years of matriculation

** Successful or Still Enrolled is defined as students who complete at least 30 credit hours with a GPA of 2.00 or better, who have transferred or who are still enrolled at the institution

*** Allegany data is obtained from sources not including the National Student Clearinghouse.

+ Baltimore County is not able to identify categories of students (i.e. college-ready, developmental completers, etc.) for the 2000 cohort, but is developing reporting capability for later years

++ Garrett is in the process of developing systems to exchange data with the National Student Clearinghouse

+++ Totals reflect summation of cohort data as reported by the colleges, and derived percentages based solely on the reporting institutions. These may provide an "indication" or estimate of the statewide community college success levels, but should not be relied upon as a completely accurate measure at the statewide level.
