Analysis by Gender and Race - Post Graduation Education	pp. 148-151

In spring 2005, all of Maryland's public colleges and universities and nine state-aided independent campuses conducted a follow-up survey of their 2004 bachelor's degree recipients one year after graduation. Each institution administered its own questionnaire; however each included 17 common or core questions worded in an identical manner as well as consistent demographic information. This report contains the statewide responses for the *public* institutions to the 17 core questions on the survey and the campus-provided data. There were 4,202 graduates who took part in the survey, representing a response rate of 25 percent. This is below the participation rate of 29 percent achieved in the surveys of 1999 and 2001 baccalaureate recipients.

This report contains tables showing a frequency distribution for each of the core questions as well as for the institution-provided data elements. There also are selected tabulations by campus, major program, gender, race and occupation.

For several analyses, the responses of only some of the graduates were included:

- ***employment items* – only graduates who reported being employed full-time.**
- ***post graduation education items* – only graduates who indicated they were pursuing an advanced degree.**
